Nusku Fireblocker : Standard Product Guide

Nusku Fireblocker Standard Patterns

At Weaverbird there are many profiles that we consider standard to our daily operators & clients usage. These are typically the most versatile profiles that have the broadest range of installation options.

Nusku Fireblocker Custom Patterns

A huge benefit of Weaverbird is our ability to tailor a solution outside our standard offering. We develop CAD drawings internally that are specific to a project/client requirements & then mill & finish to provide a truly customized material.

WEAVERBIRD

Applications

The Boards Collection allows significant creativity & flexibility from an installation perspective. These standard profiles can be used for siding, trim, fascia, belly band & other areas where a pre-primed millwork component adds value.

1x S1S2E (1/8" R : Resawn Back)

1x4 Example	1x4	1x6	1x8	1x10	1x12
	.6875 x 3.5	.6875 x 5.5	.6875 x 7.25	.6875 x 9.25	.6875 x 11.25

*All 1x boards are available in 16' & 20' Lengths : 1x2, 1x3 & 1x14 also available with special order

5/4x S1S2E (1/8" R : Resawn Back)

5/4x4 Example	5/4x4	5/4x6	5/4x8	5/4x10	5/4x12
	1.0 x 3.5	1.0 x 5.5	1.0 x 7.25	1.0 x 9.25	1.0 x 11.25

*All 5/4x boards are available in 16' Length Only

2x S1S2E (1/8" R : Resawn Back)

2x4 Example	2x4	2x6	2x8	2x10	2x12
	1.5 x 3.5	1.5 x 5.5	1.5 x 7.25	1.5 x 9.25	1.5 x 11.25

*All 2x boards are available in 16' & 20' Lengths : 2x2, 2x3 & 2x14 also available with special order

Installation

With S1S2E Boards, material has to be face fastened with SS nails. No 316 Stainless steel ring shank siding nail are recommended and require 1-1/4" penetration into solid nailable substrate. Pre-drill to avoid splitting if less than 2" from the edge. Fastened 16" O/C for double nail.

Nominal Width	x2	x3	x4	x6	x8	x10	x12
Nails Per Stud	1 Nail	1 Nail	2 Nails	2 Nails	2 Nails	3 Nails	3 Nails

Finishing

Fireblocker is delivered factory primed & requires minimum 2 coats of high quality, 100% acrylic latex exterior paint as soon as possible after installation. Apply paint according to manufacturer's recommended spread rates & coats. Brush application ensures best coverage & protection.

Applications

The Tongue & Groove collection can be used in applications like siding, soffits, accent walls, interior/exterior ceilings and other areas hoping to hide the fastener during install.

1x T&G Reversible #709R, #711R, #712R & #713R (1/4 V-Groove : 1/2" Reveal)
