Fire Rating: Class B

Applications

Kebony has a broad range of applications & installation types. It is exceptional for high traffic boardwalks & decking but has the character/aesthetic for any architectural feature or cladding application.

Maintenance & Resistance

Kebony is a low maintenance wood that does not require any additional treatment beyond normal cleaning. Removal of dirt, sand and other particles is simply done with a brush & water. Kebony is highly resistant to decay, fungi, insects & other wood-destroying microorganisms. That's why it carries a 30-year limited warranty against rot for residential & a 25-year limited warranty for commercial applications. For more details, view US warranty info on www.kebony.us
